STEP 6 OF 8 · NGĀ-PŪ-TORU & MANGAIA

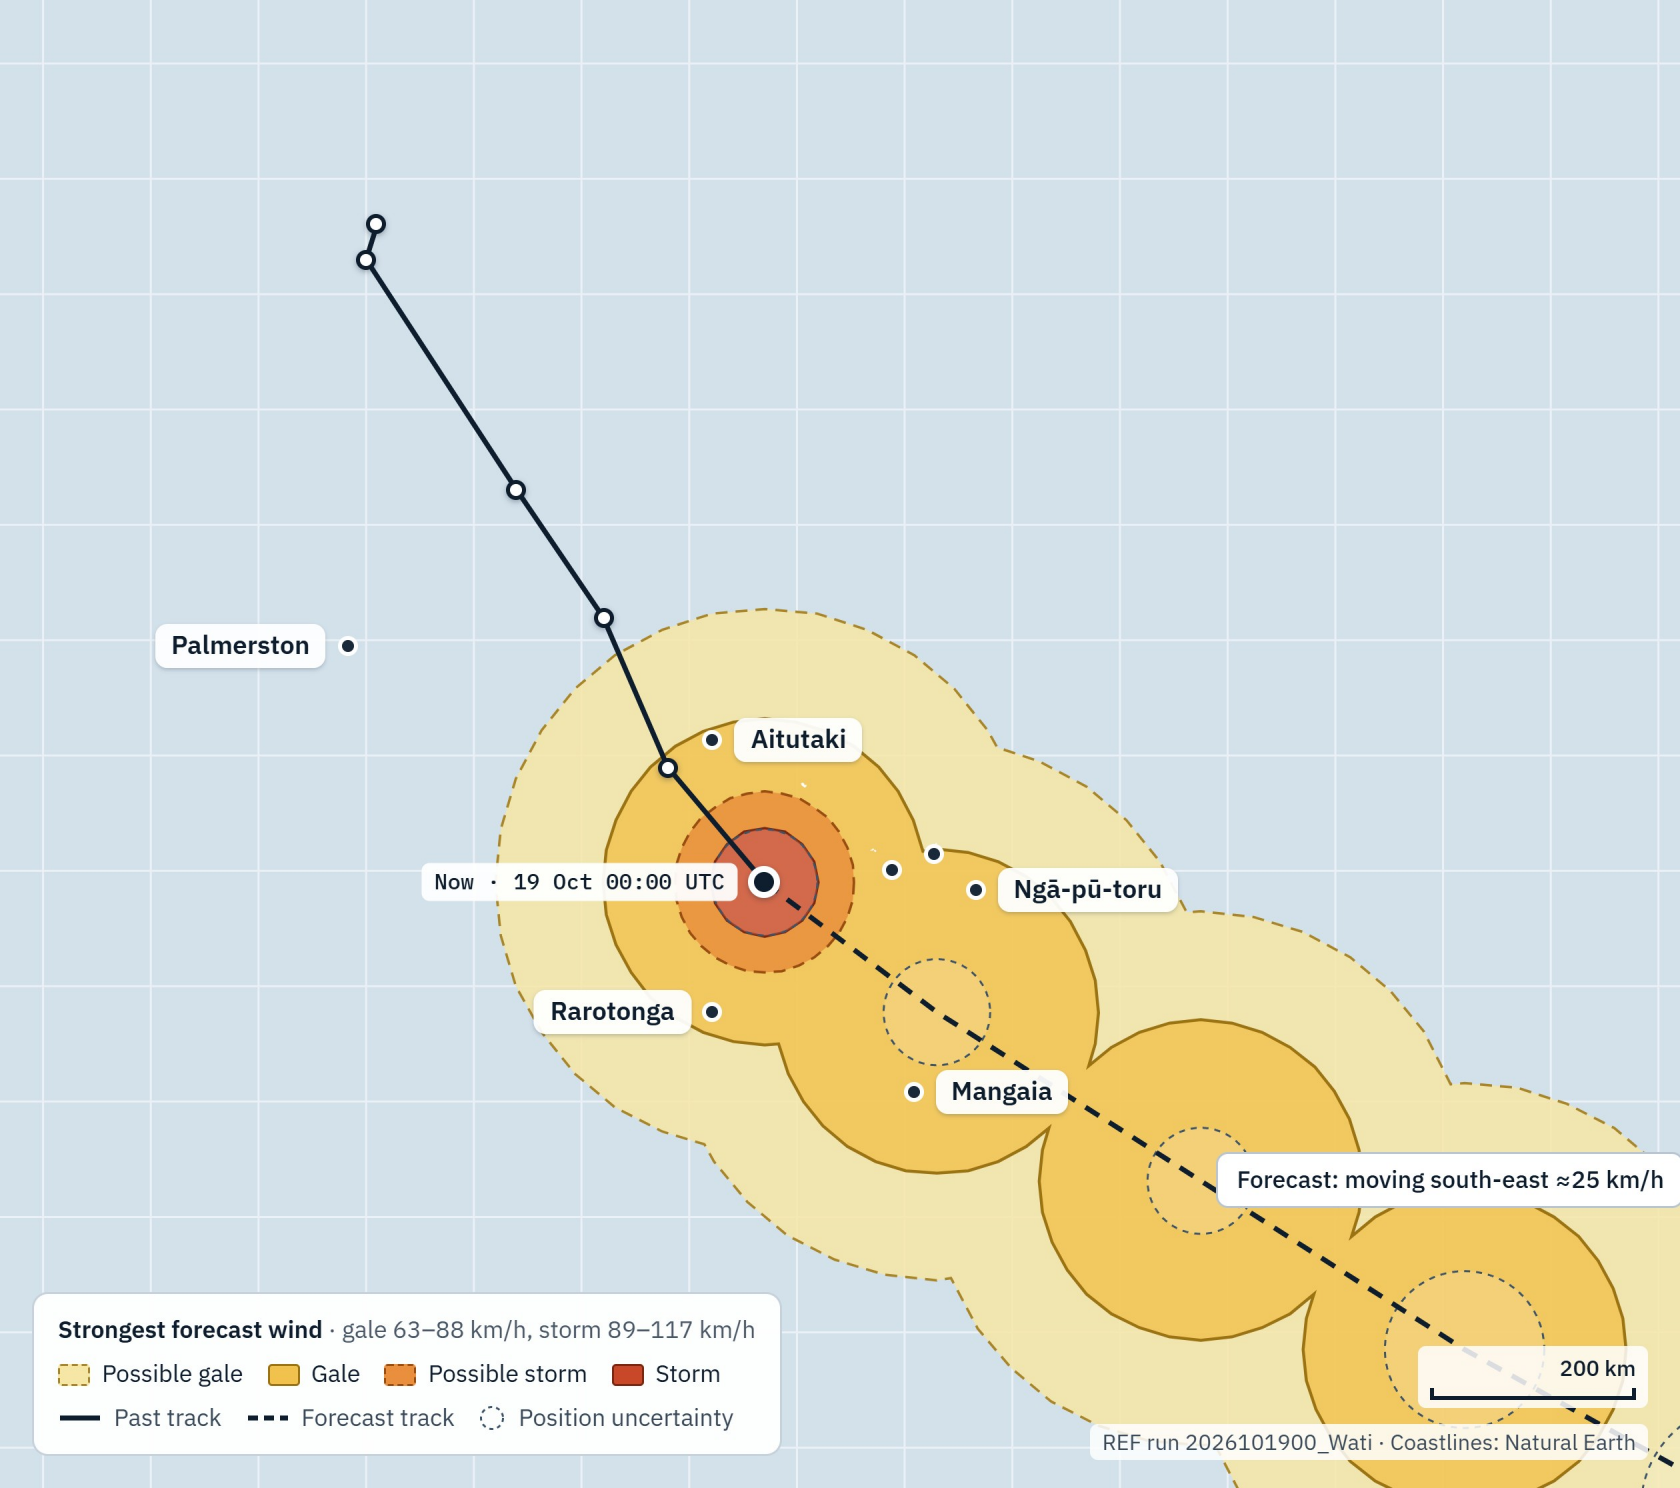

Ngā-pū-toru and Mangaia sit closest to the track

The forecast track runs between them, about 77 km from Mangaia and 83 km from Atiu. Together the four islands have about 1,500 people in the gale zone.

Island	People	Buildings	Evac. centres	Schools
Mangaia	522	752	7	3
Atiu	461	778	10	2
Mauke	372	463	7	1
Mitiaro	181	393	0*	1
Total	**1,536**	**2,386**	**24**	**7**

* No evacuation centres recorded for Mitiaro in the exposure data. Confirm locally.

STEP 1 OF 8 · THE SITUATION

Gale-force winds forecast for all six inhabited southern islands

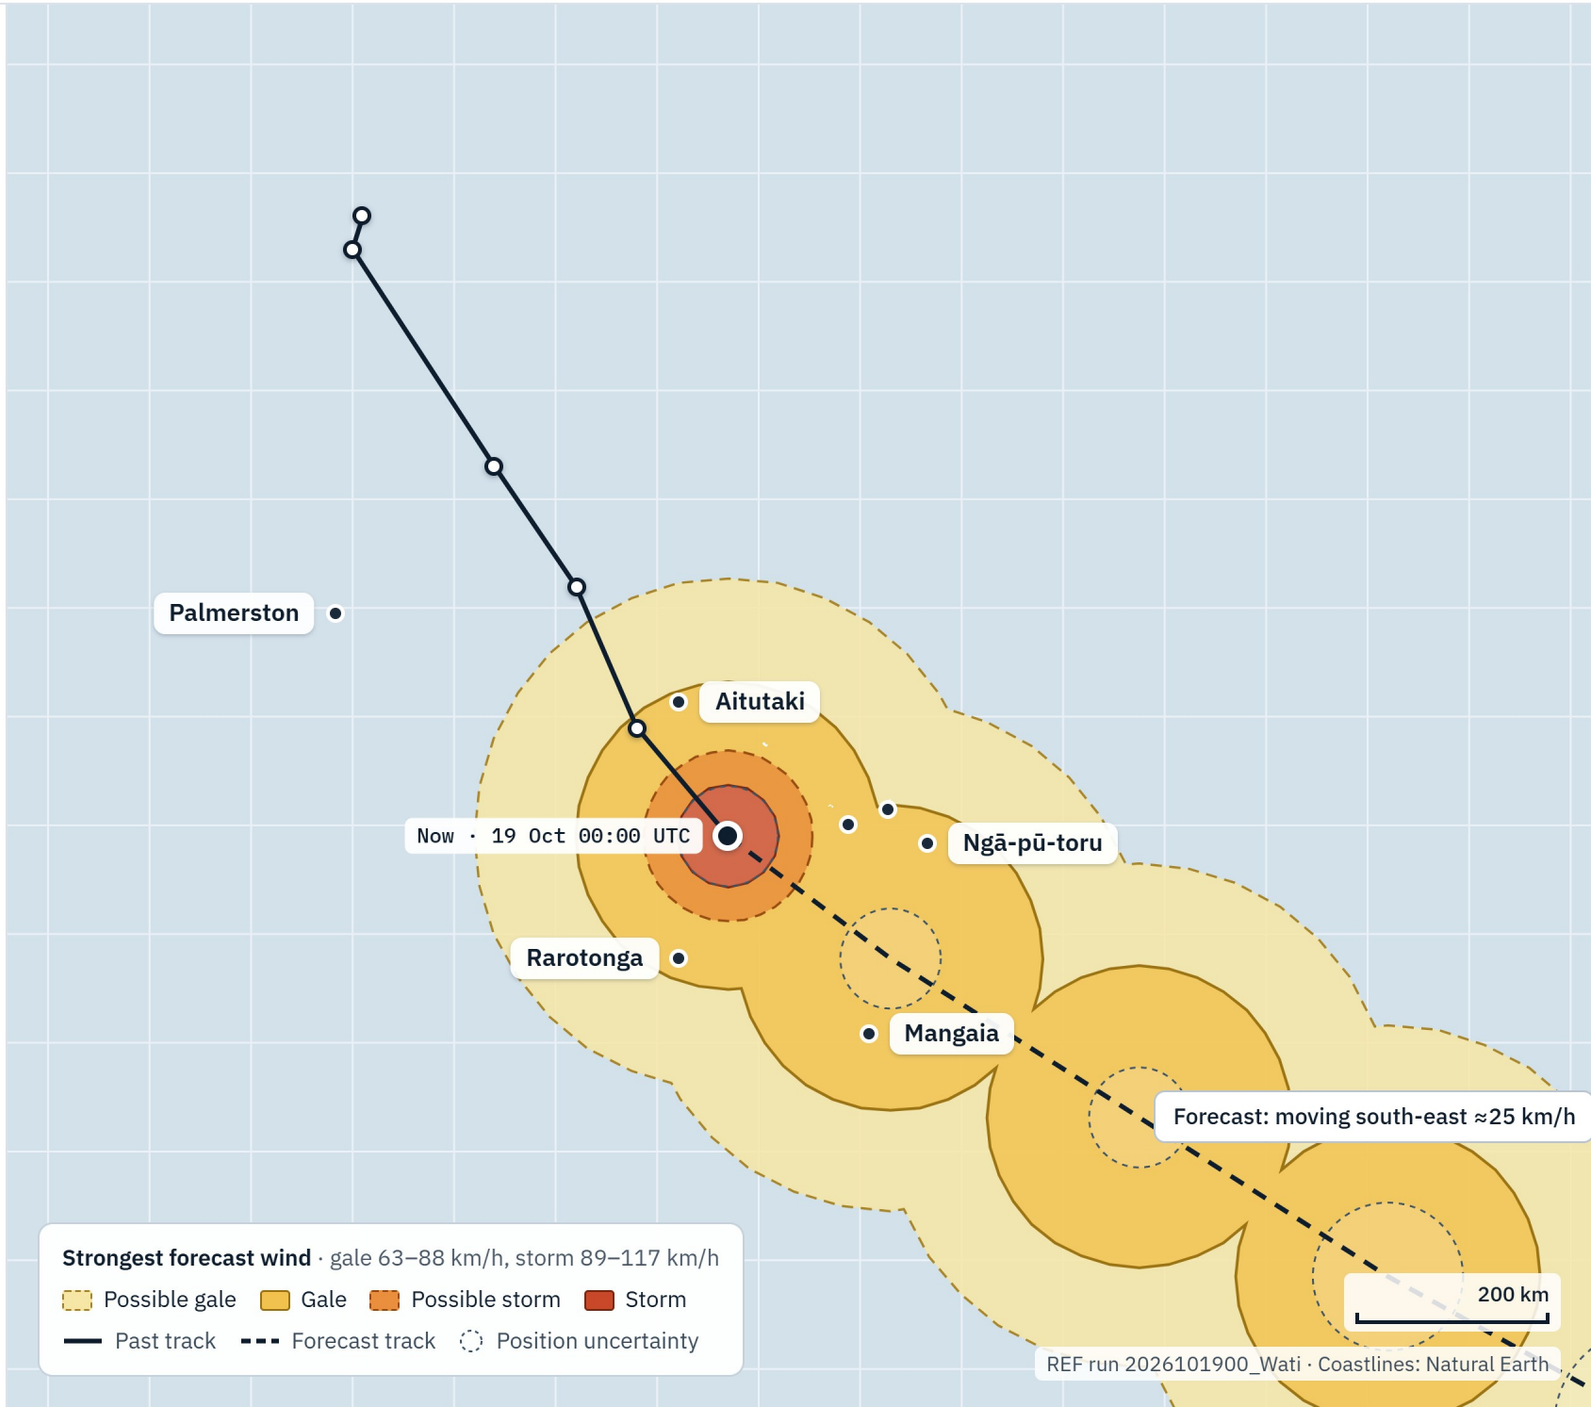

At 2:00 pm Cook Islands time, Wati's centre was about 125–150 km from Atiu, Rarotonga and Aitutaki. This advisory puts 92% of the country's population inside forecast wind zones.

People in wind zones
≈14,100
92% of 15,280

Buildings
≈16,700
≈10,300 residential

Building value

Next: Track →

STEP 2 OF 8 · THE TRACK

Wati is moving south-east at about 25 km/h

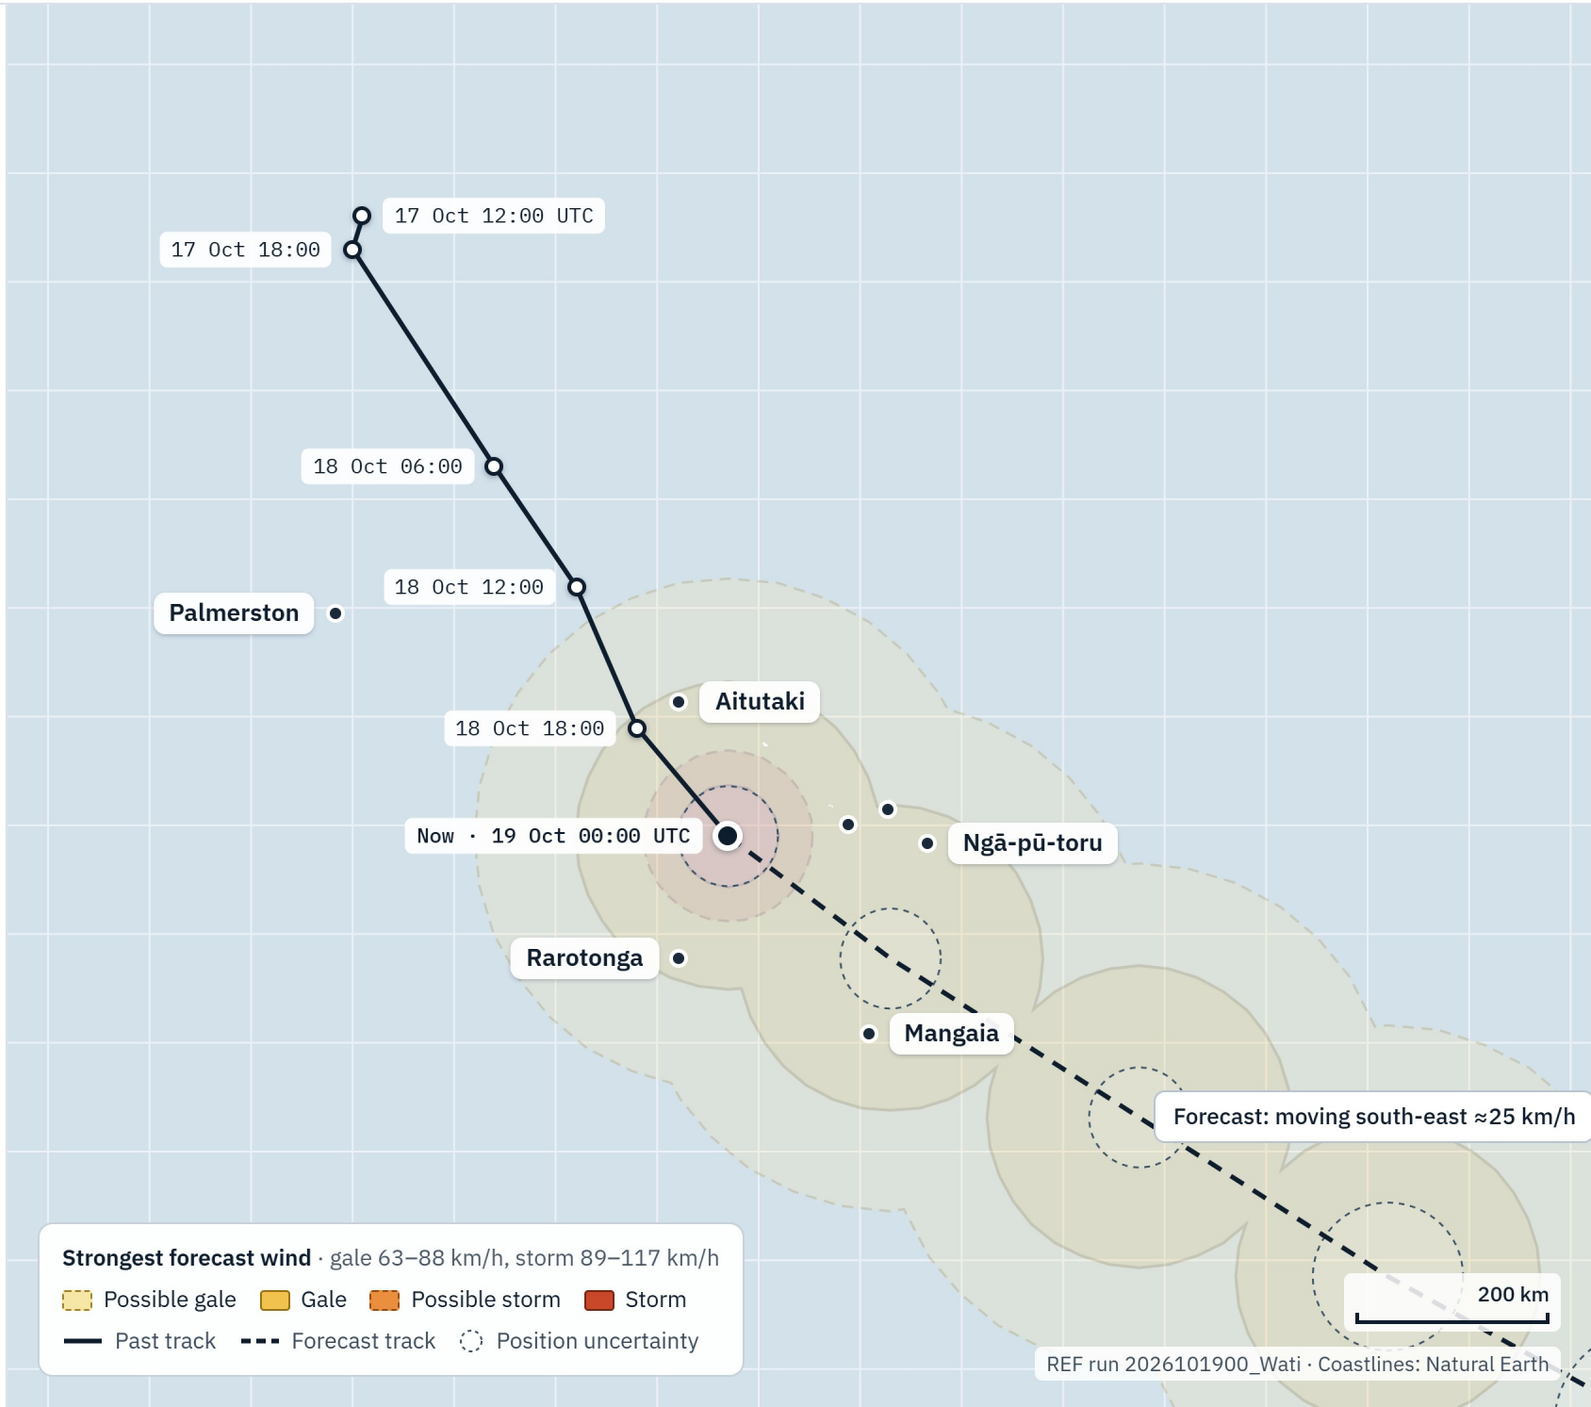

Over the past 36 hours the centre tracked from well north of Palmerston to between Aitutaki and Atiu. The forecast takes it away to the south-east, between Ngā-pū-toru and Mangaia.

Closest approach to the forecast track

Island	Distance	When
Mangaia	≈77 km	[TIME]
Atiu	≈83 km	[TIME]
Mauke	≈117 km	[TIME]
Mitiaro	≈120 km	[TIME]
Rarotonga	≈130 km	[TIME]
Aitutaki	≈146 km	[TIME]

Next: Wind →

1 2 3 4 5 6 7 8

STEP 3 OF 8 · THE WIND

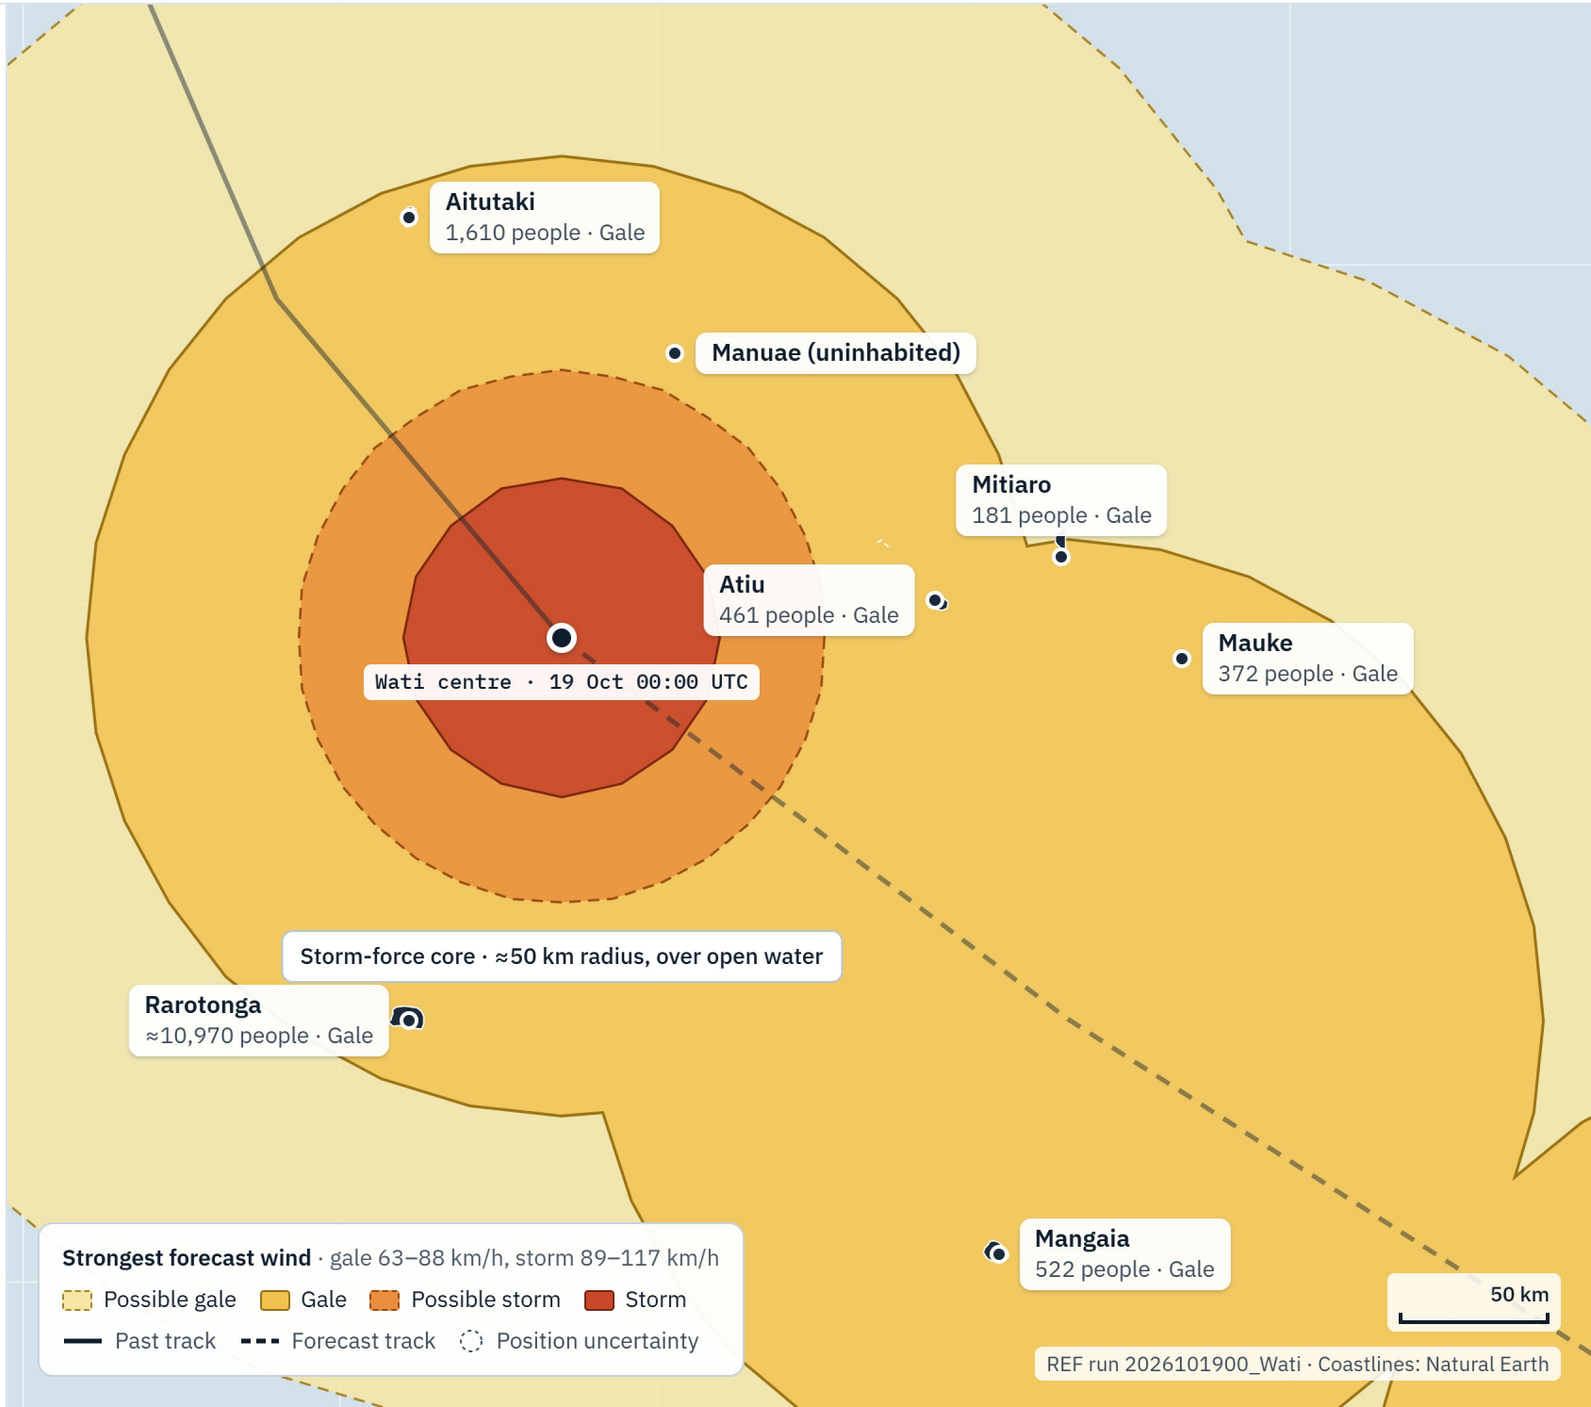

Gales reach every island; the storm-force core stays at sea

Gale-force winds (63–88 km/h) cover a band about 300 km wide along the track. Storm-force winds (89–117 km/h) are forecast only within about 50 km of the centre.

Island	People	Wind	Inside gale edge by
Rarotonga	≈10,970	Gale	≈21 km
Aitutaki	1,610	Gale	**≈10 km**
Mangaia	522	Gale	≈74 km
Atiu	461	Gale	≈35 km
Mauke	372	Gale	≈32 km
Mitiaro	181	Gale	**≈5 km**

Aitutaki and Mitiaro sit within 10 km of the gale edge, so a small shift in the track can change their category.

Back
Next: Rarotonga →

STEP 4 OF 8 · RAROTONGA

Rarotonga: about 11,000 people, 20 km inside the gale edge

Nearly four in five exposed people are on Rarotonga. The island is about 130 km from the forecast track: close enough for gales, well clear of the storm-force core.

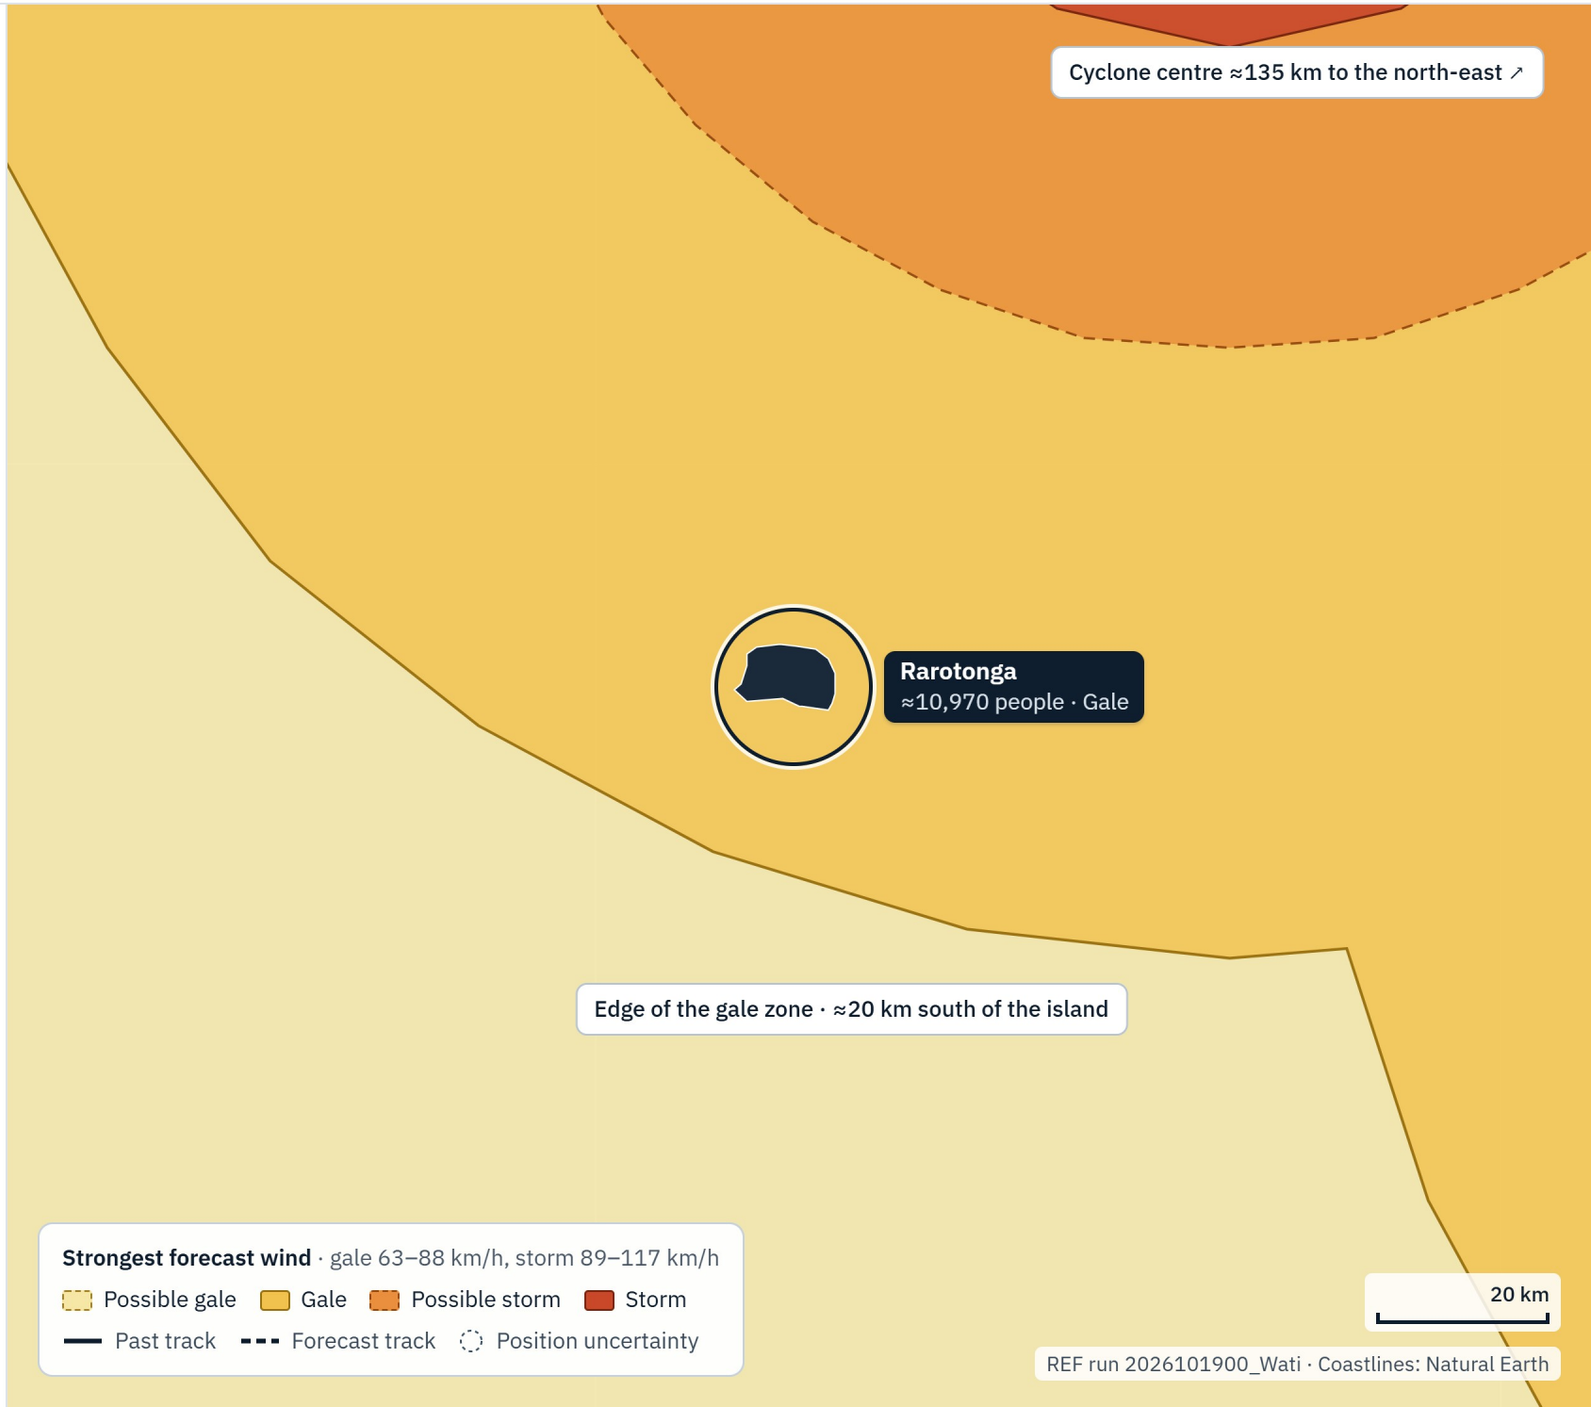

People	Buildings	Value
≈10,970	≈10,770	$1.10B

Roads	Crops	Wind
245 km	$2.0M	Gale

Facilities in the gale zone

6 health · 13 schools · 18 evacuation centres

Includes Tereora College, Apii Nikao and Nikao CICC Hall.

STEP 5 OF 8 · AITUTAKI

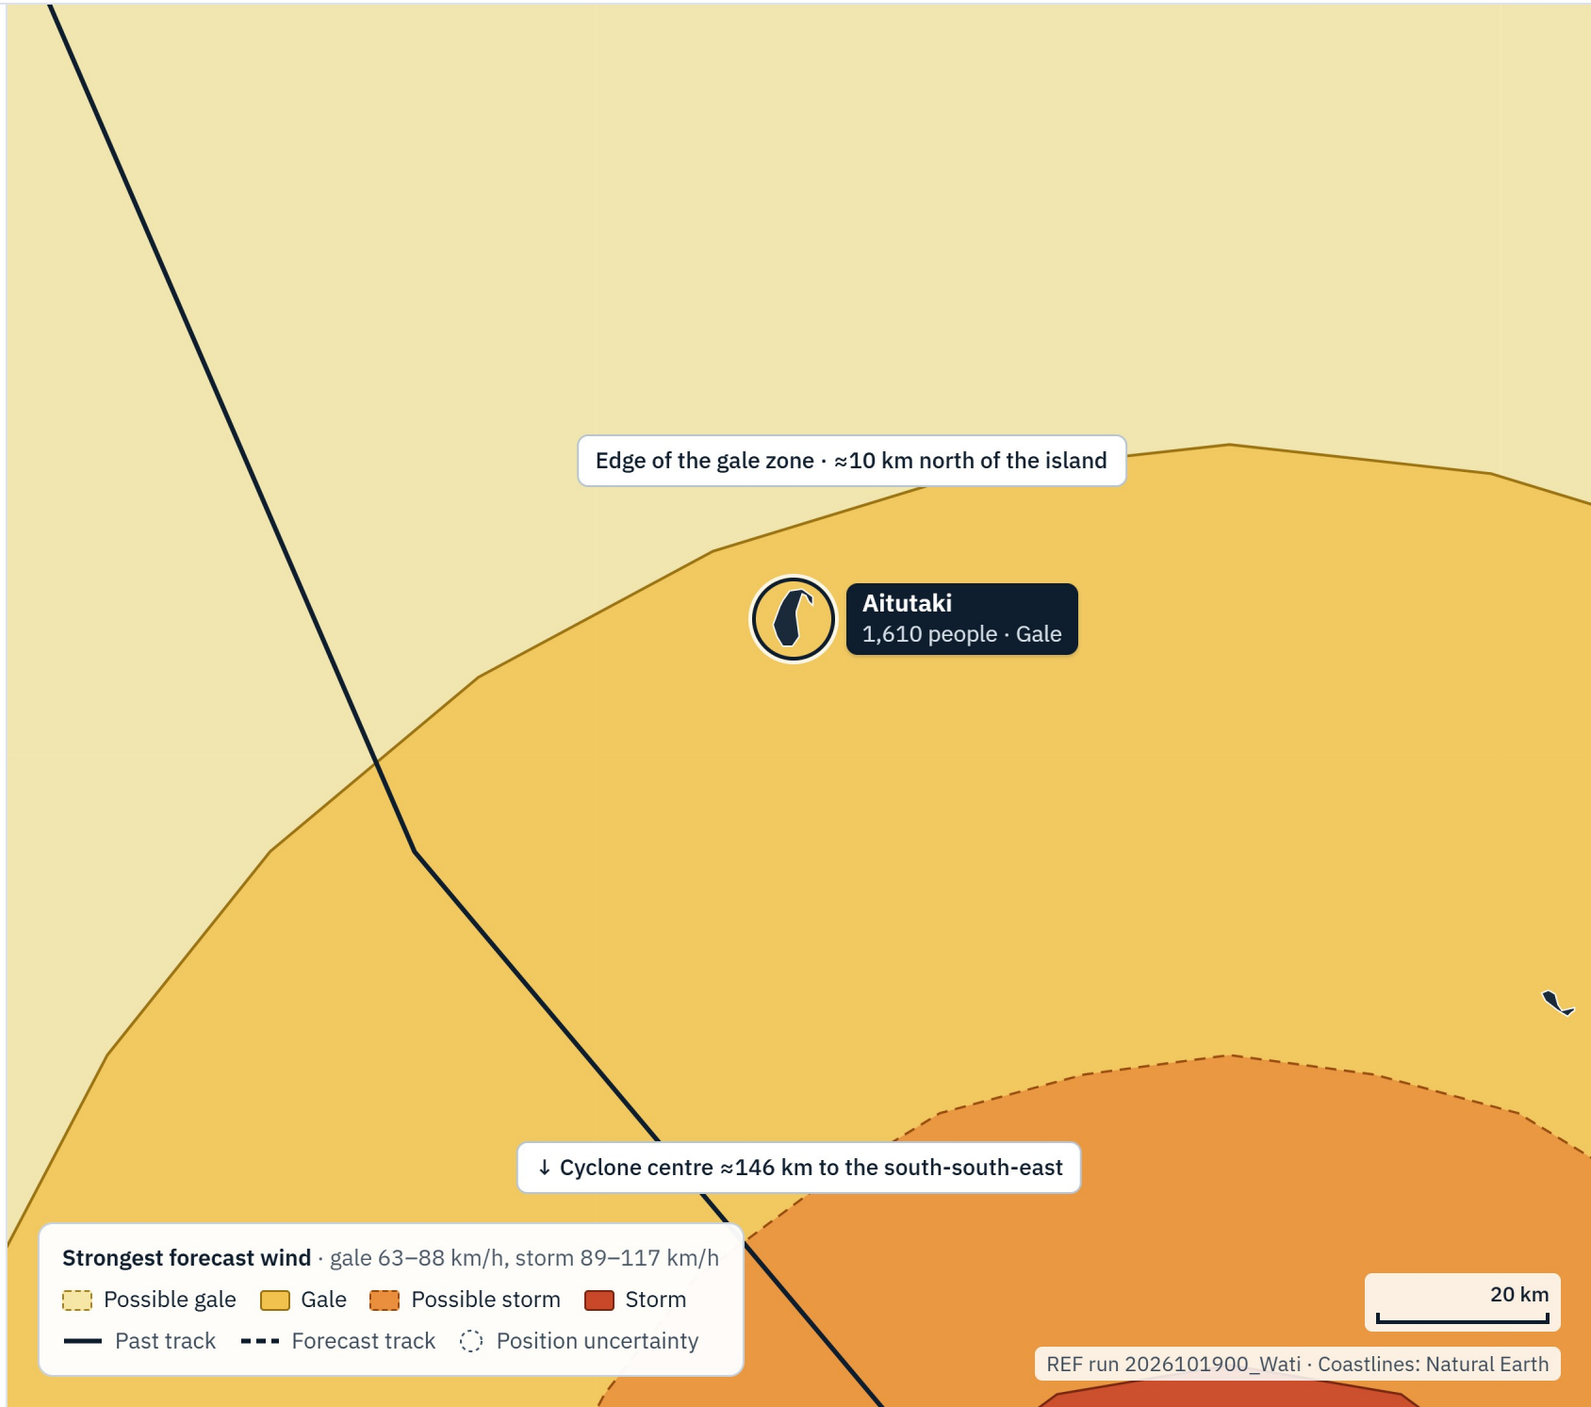

Aitutaki: 1,600 people on the edge of the gale zone

The gale boundary passes about 10 km north of the island, so small track changes matter here. In the 18 Oct 18:00 UTC run, Aitutaki was briefly inside storm-force winds.

People	Buildings	Value
1,610	3,560	$133M

Roads	Health	Schools
103 km	3	4

⚠ **No evacuation centres recorded.** The exposure data lists 0 for Aitutaki. Confirm shelters with the Island Government before relying on this count.

STEP 6 OF 8 · NGĀ-PŪ-TORU & MANGAIA

Ngā-pū-toru and Mangaia sit closest to the track

The forecast track runs between them, about 77 km from Mangaia and 83 km from Atiu. Together the four islands have about 1,500 people in the gale zone.

Island	People	Buildings	Evac. centres	Schools
Mangaia	522	752	7	3
Atiu	461	778	10	2
Mauke	372	463	7	1
Mitiaro	181	393	0*	1
Total	**1,536**	**2,386**	**24**	**7**

* No evacuation centres recorded for Mitiaro in the exposure data. Confirm locally.

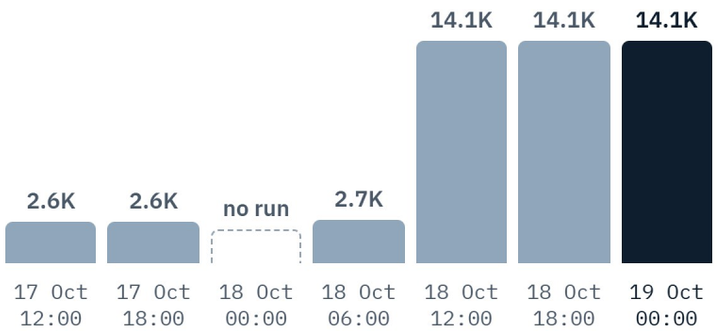

1 2 3 4 5 6 **7** 8

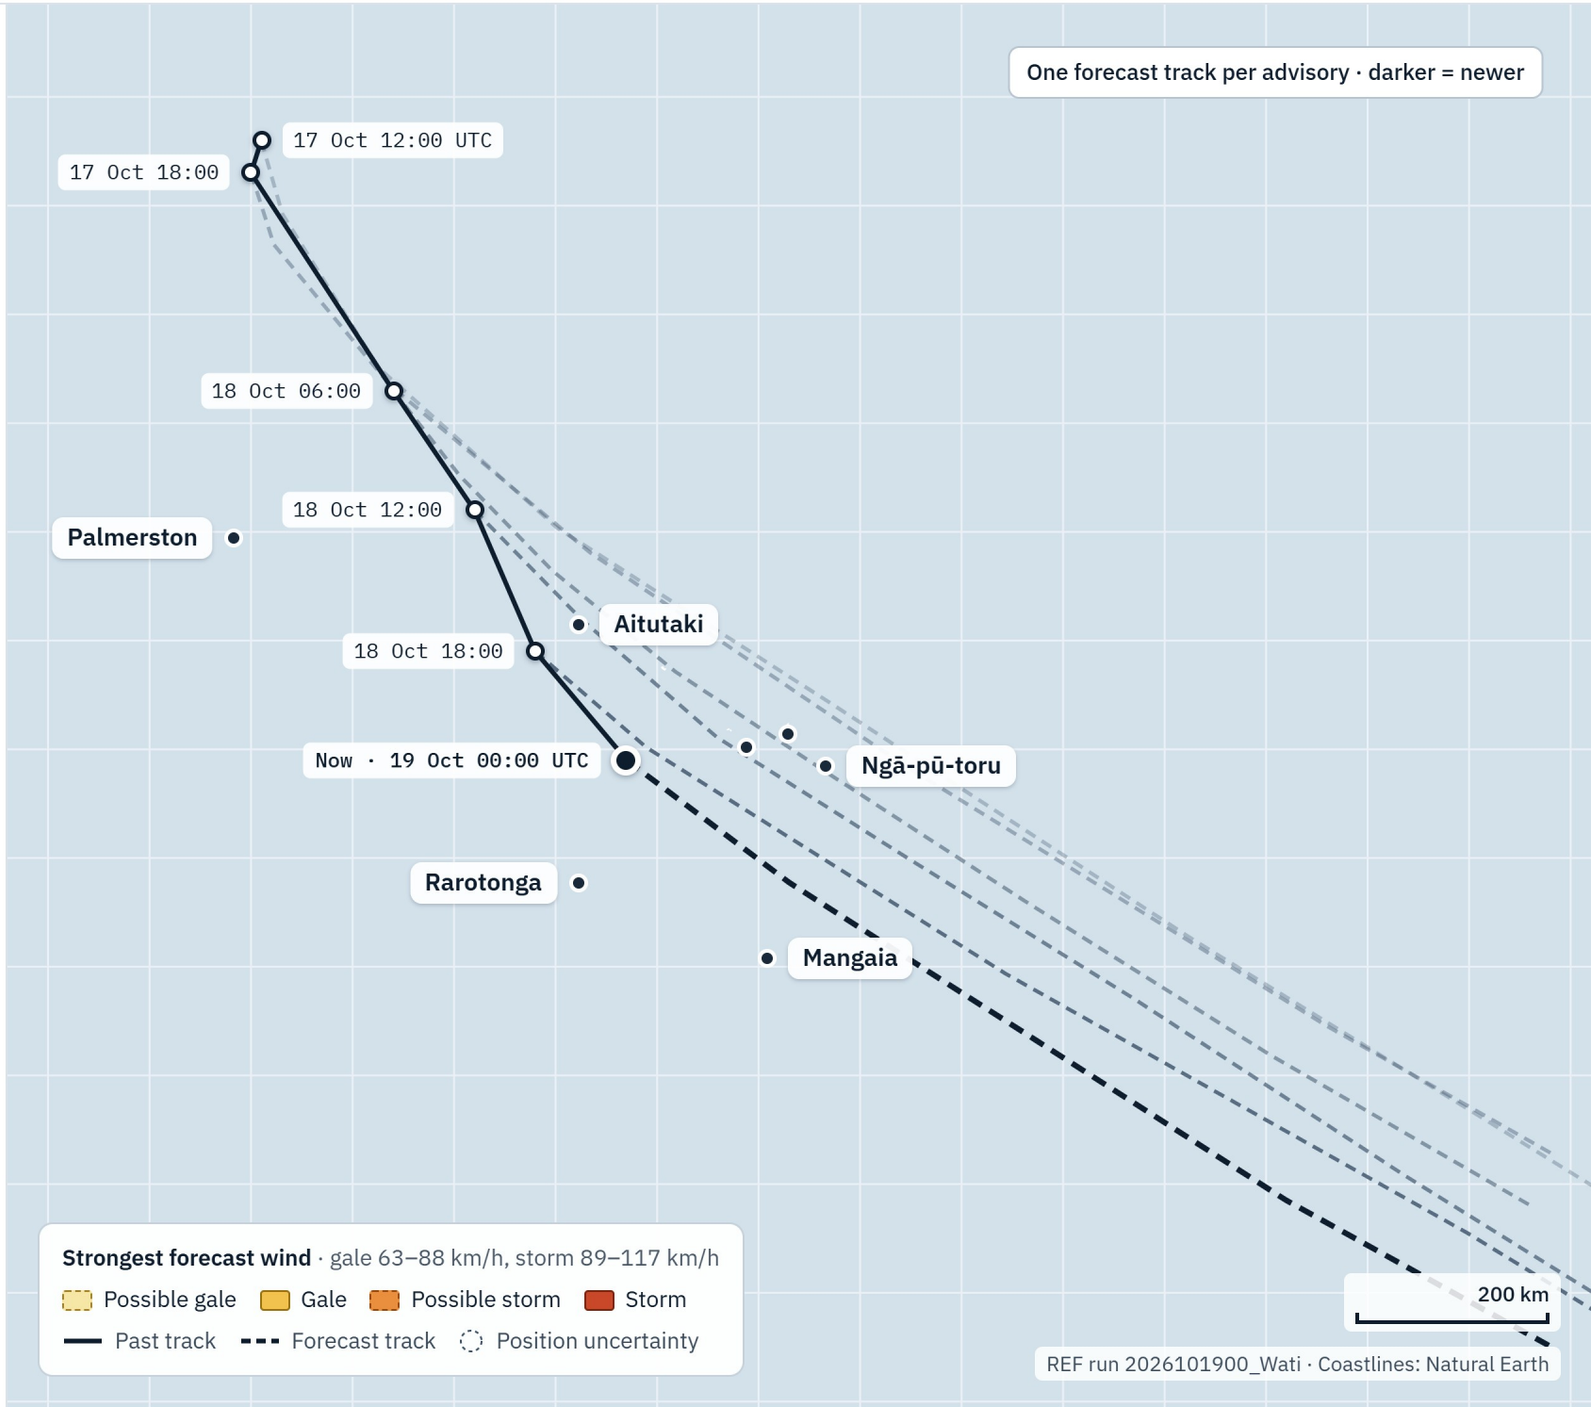

STEP 7 OF 8 · HOW THE FORECAST CHANGED

Exposure jumped five-fold when the track shifted toward Rarotonga

At 18 Oct 12:00 UTC the track moved south-west and Rarotonga and Mangaia entered the wind zones (+11,420 people). The total has held for three runs; island wind categories still shift.

People in forecast wind zones, by advisory (UTC) Population 15,280

What this forecast does not show

These figures show what sits inside forecast wind zones, not what will be damaged. Use them alongside official warnings from the Cook Islands Meteorological Service.

Not modelled

- Storm surge, high waves and coastal inundation
- Heavy rain and flooding
- Damage or expected loss

Before acting

- Check for a newer advisory (next expected ≈06:00 UTC)
- Confirm evacuation centres on Aitutaki and Mitiaro
- Contact: [NATIONAL EOC CONTACT]
